

## Shock resistant turbo molecular pump

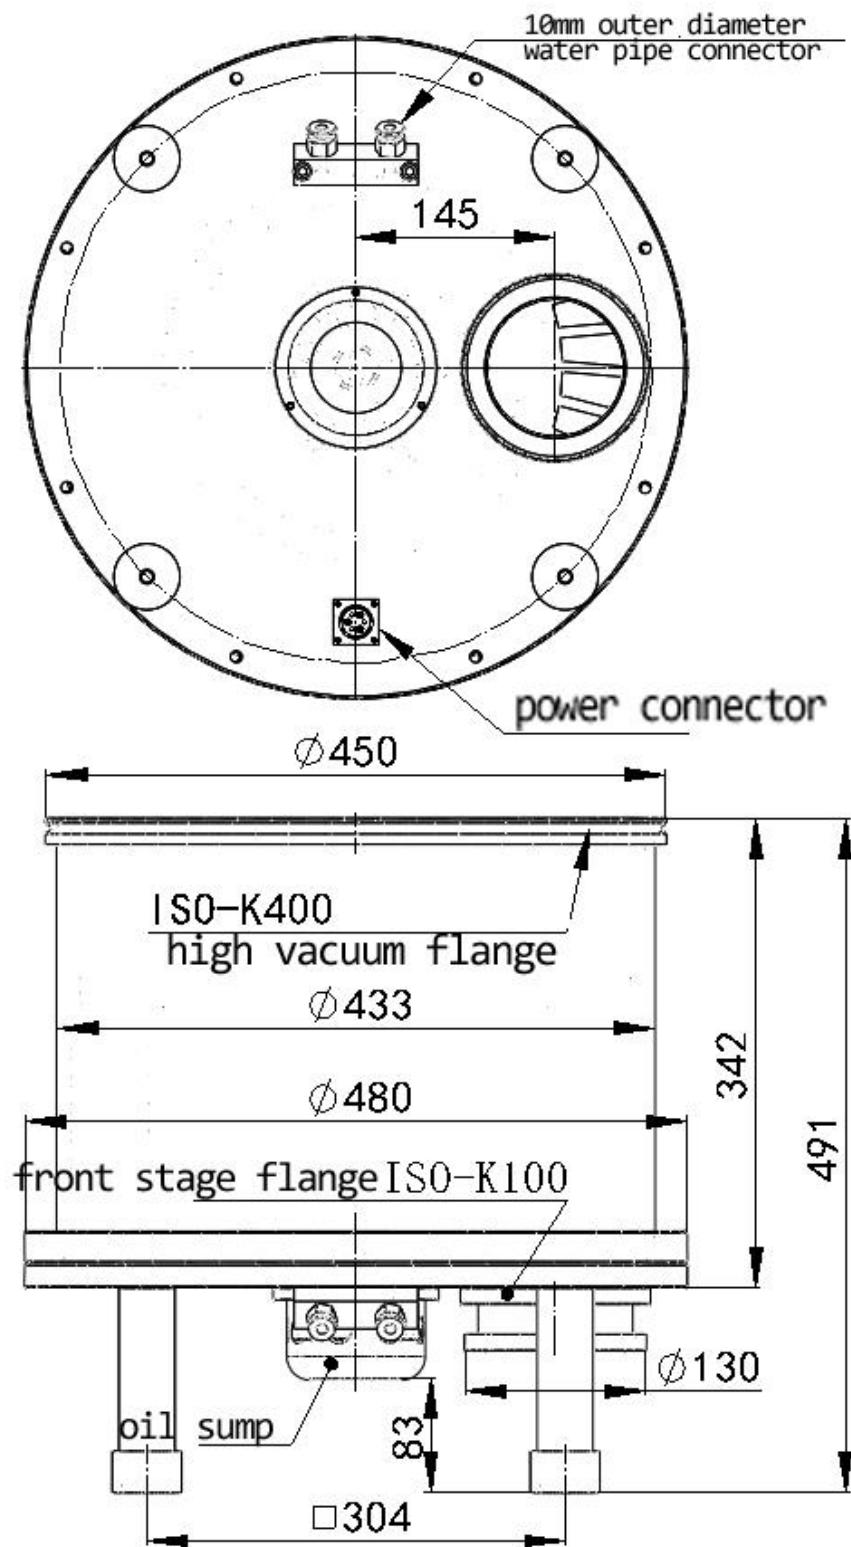

### Parameters Table

| JTFB-4000 Technical parameter table of turbomolecular pump |                     |                     |
|--|---------------------|---------------------|
| Model number   | JTFB-4000           |                     |
| Air intake flange  | 400 ISO-K           |                     |
| Exhaust port flange  | 100 ISO-K           |                     |
| Pumping rate(L/S)(For air)                                 | 4000                |                     |
| Compression ratio  | N <sub>2</sub>      | >10 <sup>-8</sup>   |
|  | H <sub>2</sub>      | >5*10 <sup>-2</sup> |
| Ultimate pressure(Pa)                                      | <2*10 <sup>-6</sup> |                     |
| Rated speed(rpm)   | 15000               |                     |
| Vibration value (μm)                                       | ≤0.15               |                     |
| Start-up time(min)   | <18                 |                     |
| Down time(min)   | <25                 |                     |
| Recommended use of the front stage pump (L / S)            | 30-70               |                     |
| Cooling mode   | water-cooling       |                     |
| Cooling water temperature (°C)                             | ≤25                 |                     |
| Cooling water flow(L/min)                                  | 2 L/min             |                     |
| Pump body baking temperature (°C)                          | <120                |                     |
| Mounting direction   | Vertical ±5°        |                     |
| Pump weight(kg)  | ≈100                |                     |

| JTFB-4200 Technical parameter table of turbomolecular pump |                |                     |
|--|----------------|---------------------|
| Model number   |                | JTFB-4200           |
| Air intake flange  |                | 400 ISO-K           |
| Exhaust port flange  |                | 100 ISO-K           |
| Pumping rate(L/S)(For air)                                 |                | 4200                |
| Compression ratio  | N <sub>2</sub> | >10 <sup>-8</sup>   |
|  | H <sub>2</sub> | >5*10 <sup>-2</sup> |
| Ultimate pressure(Pa)                                      |                | <2*10 <sup>-6</sup> |
| Rated speed(rpm)   |                | 15600               |
| Vibration value (μm)                                       |                | ≤0.15               |
| Start-up time(min)   |                | <18                 |
| Down time(min)   |                | <25                 |
| Recommended use of the front stage pump (L / S)            |                | 30-70               |
| Cooling mode   |                | water-cooling       |
| Cooling water temperature (°C)                             |                | ≤25                 |
| Cooling water flow(L/min)                                  |                | 2 L/min             |
| Pump body baking temperature (°C)                          |                | <120                |
| Mounting direction   |                | Vertical ±5°        |
| Pump weight(kg)  |                | ≈100                |
